About Allround Seaweed

What Allround Seaweed does

We have two partners involved: CIV Den Oever u.a. and North seaweed BV
We are a Dutch allround provider in seaweed disciplines:

- consultancy (nutricial and operational)
- cultivation (near-shore, onshore; open-air and indoor)
- cultivation equipment
- seaweed based products
- sales

Allround Seaweed Centre Netherlands

- cultivation and procurement of biomass components
- storage and logistics
- blending / mixing (seaweed, land weed, spent grains)
- trade

We operate the following activities:

- development of seaweed based projects, products and cooperation
- developing Allround Seaweed Centre Netherlands; the Dutch seaweed hub
- operating onshore and near-shore seaweed cultivation
- **sourcing of seaweed biomass from abroad**
- mixing and blending of seaweed based animal feed
- **nutricial consultancy on animal specific feed**
- procurement and manufacturing of onshore cultivation equipment
- sales of seaweed based biomass and cultivation equipment

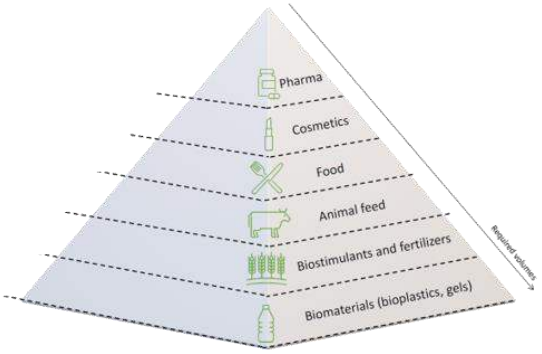
How we do it

Vision: Providing achievable seaweed solutions

- should be sustainable
- should be scalable
- must be feasible
- must be marketable



Strategic market approach – 3V's:

- Volume – constant availability
- Validity – constant quality
- Vitality – constant availability

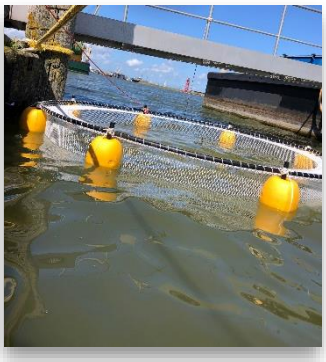
Technical quality approach

- higher quality requirements, higher controllability/manageability demands
- adapt to market ratios of required quality, acceptable costs, feasible volumes

Application of Allround Seaweed cultivation systems

Application: offshore seaweed cultivation
Anchorage: heavy anchoring; sea secure; pile or suction anchors
Orientation: vertical
Growth medium: netting
Reproduction: seeding

Application: near-shore seaweed cultivation
Anchorage: normal anchoring; sea secure; anchoring stone
Orientation: horizontal
Growth medium: baskets
Reproduction: introduction of new fresh biomass



Application: onshore open-air seaweed cultivation
Anchorage: n.a.
Orientation: n.a.
Growth medium: free floating or mini-baskets
Reproduction: introduction of new fresh biomass
